

BIRÒ I'm Easy.

THE REAL GRANDNESS
IS IN THE SIMPLICITY.

Now up to
14% less!

Now even more simple and convenient!

Explore new features below.

BiròCard: Easier and safer than a key.

A technological revolution with the new BiròCard. A coded electronic card that substitutes the traditional key to turn on and off the vehicle. More practical, safer and modern.

Easy choice: 2 configurations, 2 types of batteries.

Choosing the Birò that suits your mobility needs the best is now even easier. Birò *Summer* for those who want 4 wheels and a ceiling overhead, Birò *Winter* to travel comfortably and protected from cold and rainy days too. The battery choice is easier as well. There are two options: Re-Move removable lithium or non-removable lithium Maxi.

Larger range: Up to 40% more.

Birò now offers up to a 55 km range with the new Re-Move battery and up to a 100km range with the Maxi battery. This means up to 40% more than the previous generation of batteries.

Doors: Now removable in less than 15 seconds.

Attaching and detaching the doors of Birò has never been so easy and fast. The new hinges no longer require you to remove any pins. In a matter of seconds. Even a kid could do it. You need to try it to believe it.

Defrost windscreen: Easy, Fast, Silent.

Birò *Winter* is not worried about the cold because the standard windscreen is covered by a very thin and semi-invisible electric heat grid that, once activated, warms the windscreen up, defogging and de-icing it in a more effective, faster and silent way than the previous fan system. The result is always an optimal view.

More comfort with the new suspension.

On the road the suspension has to make the tyres to follow all the bumps in the terrain. The new standard suspension better absorbs the bumps in the road, guaranteeing a superior traction and better comfort while driving.

An "extra oomph" in the city.

In traffic or on roads with low speed limits, a speed cap function is a practical and useful aid in order to respect traffic laws. For this reason, a two-speed selector (30km/h and 45km/h) is now standard on all Biròs.

Portable speaker: Music and calls everywhere.

Your music follows you everywhere, inside and outside of Birò. The portable speaker provided with Birò *Winter* connects to your smartphone via Bluetooth® so that you can listen to your musical files and use speakerphone to make calls everywhere, thanks to the internal rechargeable battery.

USB port: Your smartphone always charged.

Not only Birò needs to recharge its batteries. Now a USB port is standard in order to fill your mobile devices' tank full of energy.

Birò umbrella: Always with you when you need it.

Birò *Winter* is for your daily commute, rain or shine. For this reason, a foldable umbrella with an automatic opening system is constantly at your side to always keep you dry at your appointments.

Garment hook: More space for your belongings.

Either for your jacket or your grocery bag, the new garment hook allows you to best organize your daily personal belongings.

Side maxi mirrors now standard: Wide view always.

Increasing your driving view. This means freedom and safety as well, so Birò now offers the side maxi mirrors as standard equipment (previously optional) in order to always give you a better view.

3 point safety belts now standard: Safety for everyone.

Safety is not optional. The 3 point safety belts is now standard no matter the configuration chosen.

175 width rear tyres now standard.

There is no freedom without safety. The 175 width rear tyres are now standard in order to guarantee higher stability and traction while turning.

More choice among 99 colours.

Freedom means being able to choose. You can now customize your Birò by choosing among 99 colours. A world of possibilities in front of you.

More convenient: Up to 14% less!

All these advantages at a lower price! Now Birò costs up to € 700 less with the Re-Move battery and up to € 1.500 less with the Maxi battery.
